

NS ROOFING (Pty) Ltd

Roofs, Gutters & Coatings
Professional Contractors

About Us

NS Roofing is Gauteng's leading specialist in modern steel and metal roofing systems, delivering high-performance solutions designed to withstand South Africa's demanding climate. Our expertise is built on a deliberate shift away from outdated, high-maintenance roofing materials towards durable Chromadek, IBR, and corrugated steel systems, engineered for longevity, safety, and architectural refinement.

Our Core Values

At the heart of NS Roofing is a set of non-negotiable values that guide every project:

Specialisation: We do not generalise. We master metal roofing and complementary renovation systems to maintain unmatched industry expertise.

Integrity: Fair pricing, transparent communication, and honest recommendations—always.

Engineered Durability: Every sheet, flashing, coating, and fastener is chosen for proven performance.

Safety: We comply with strict SANS and ISO safety protocols and maintain a complete, up-to-date safety file.

Why Clients Trust Us

We consistently deliver results that combine technical accuracy with modern aesthetics—backed by strong guarantees, full insurance cover, and transparent processes. Our approach focuses on long-term performance rather than short-term fixes, making us the preferred partner for homeowners, property managers, industrial facilities, commercial buildings, and sectional title estates.

Project Highlight

Modern Residential Transformation – Bryanston

Complete Chromadek upgrade, custom flashings, fascias, and exterior painting. Result: a modern aesthetic and a permanently leak-free roof.

Industrial Warehouse Re-Roofing – Isando

Heavy-duty IBR installation, custom-engineered large-volume box gutters, and leak elimination for a major logistics facility.

Seamless Waterproofing – Pretoria Office Block

Polymer coating applied over failing metal roof laps and fasteners—achieving total leak elimination and improved internal temperature control.
